

ATS RESUME SCORE

Score: 72/100

=====

STRENGTHS

Strengths: * The candidate has relevant programming skills as per the job requirements, including Java, Spring Boot, and RESTful APIs. * They have hands-on experience in building web applications and integrating databases. * The candidate has a strong foundation in OOP concepts and MVC architecture. * Rewrite the objective statement to make it more specific and highlight the candidate's unique strengths and experiences. * Add more specific details to the education section, such as university reputation, course curriculum, and relevant coursework. * Revise the technical skills section to use bullet points and proper indentation for better readability. * Add specific details to the work experience section, such as duration of the internship, achievements, and responsibilities. * Expand the projects section to include more details about the project's impact, technical challenges, and lessons learned. * Standardize the resume formatting for better readability.

=====

WEAKNESSES

Weaknesses: * The objective statement is overly generic and does not clearly highlight the candidate's unique value proposition. * The education section lacks specific details, such as university reputation, course curriculum, and relevant coursework. * The technical skills section is not bullet-pointed and lacks indentation, making it difficult to read. * The work experience section lacks specific details about the duration of the internship, achievements, and responsibilities. * The projects section is incomplete and could benefit from more details about the project's impact, technical challenges, and lessons learned. * The resume formatting is not standardized and could be improved for better readability.

IMPROVEMENTS

Improvements:

=====

SUITABLE JOB ROLES

Suitable Job Roles: * Junior Java Developer * Backend Developer * Full Stack Developer
ATS Analysis: * Formatting: 6/10 - The resume formatting is not standardized, and the layout is not visually appealing. There are also some inconsistencies in font sizes and styles. * Keywords: 8/10 - The resume includes relevant keywords such as Java, Spring Boot, and RESTful APIs, but could benefit from more context-specific keywords. * Technical Skills: 8/10 - The technical skills section is

incomplete and lacks proper indentation, making it difficult to read. * Projects: 4/10 - The projects section is incomplete and lacks details about the project's impact, technical challenges, and lessons learned. * Communication: 7/10 - The language is formal and professional, but the content is not engaging or conversational.
